

1 point

1. Which of the following is an open-source platform for sharing and hosting AI models?

- ☐ LLamafle
- ☐ Microsoft Azure
- ☒ Hugging Face
- ☐ OpenAI

1 point

2. What is the purpose of an inference API?

- ☐ To share a model on Hugging Face
- ☐ To deploy a model to the cloud
- ☐ To train a new AI model
- ☒ To generate predictions or outputs from a pre-trained model

1 point

3. What is the advantage of running a local model like with LLamafle?

- ☐ It requires a paid subscription to a cloud service
- ☒ It allows you to explore and develop applications without the cost of cloud services
- ☐ It ensures better performance and faster response times
- ☐ It provides access to the latest and most advanced models

1 point

4. What is the purpose of the Azure OpenAI Service?

- ☐ To create and train new AI models
- ☐ To share open-source AI models with the community
- ☒ To use OpenAI's pre-trained models like GPT-3 on the Microsoft Azure cloud
- ☐ To run AI models locally on your computer

1 point

5. What is the purpose of a cloud deployment for an AI model?

- ☐ To share the model on Hugging Face
- ☒ To make the model available and scale as a service that can be accessed via an API
- ☐ To train the model on large datasets
- ☐ To run the model locally on your computer
